

# Tales of compassion

## MEET LUCKY

**In his first weeks with us, Lucky faced one challenge after another. He recovered from neuter surgery, battled kennel cough, and could barely move on his own. His foster family had to carry him outside just to go to the bathroom.**

**With additional testing, it was determined by our veterinary team that his pain was caused by fractures in both of his back legs. Despite everything he had endured, Lucky remained gentle and trusting and full of quiet hope.**

**Because of supporters like you, Lucky was able to receive the specialized surgery he needed to repair both fractures.**

**With careful rest, medication, and lots of love, he is now on the long road to healing. Lucky's name could not be more fitting. He is lucky to have been rescued. Lucky to have a foster family who cares for him. And lucky to have a community that believes every animal deserves a second chance.**
